

Case Study: Ole & Steen Bakery Extraction Canopy

Project Brief:

To design, manufacture and install a bespoke kitchen ventilation canopy over bakery ovens.

Vortex designed, manufactured and installed a bespoke extract and supply air canopy at Ole & Steen's new site in Oxford. The canopy had to be mounted over 2.5m high ovens and incorporate a safe access walkway for maintenance / cleaning of the associated ductwork/plant.

Features:

Bespoke canopy compliant to DW172 - featuring UL listed baffle grease separators, integral grease capture containers, high efficiency LED lighting, tool-free removable supply diffusers and safe access system.

Safe Access System

Manufactured at Corsair. Non-slip plate, stainless steel support channels, S.W.L 150kg.

Ideal access for duct cleaning above canopies.
