Case Study: Fratelli Restaurant Extraction & Fabrication

Project Brief:

To design, manufacture and install a bespoke kitchen extraction canopy over cooking range, wall cladding, ventilation system, bespoke servery glass screen and fabrications.

Vortex designed, manufactured and installed a bespoke extract canopy, wall cladding and supply air input system.

Project Benefits:

Glass screen with stainless steel frame adds a dynamic view of the kitchen from the customers perspective in the restaurant. High temperature extraction fans with inverter controls, reduces electrical bills and provides longevity of fan motor.

Corsair Engineering Ltd also designed and manufactured Robata grille table with hot cupboard, along with front of house bar and many other fabrications...
