

## Case Study

IBIS Thurrock

# VORTEX-POD

by CORSAIR

## Powered Supply Air Module

IBIS hotel in Thurrock needed to add powered make up air to the kitchen to comply with current legislation.

*Vortex Pod* is a self contained supply air module which is easily retro fitted into existing kitchens with the minimum of expense and disruption.

The unit is complete with integral single phase axial fan unit and fan speed controller to adjust the incoming air volume.

Externally the Pod has an intake weather cowl and egg crate grille. Primary filtration is achieved with an integral EN779 G4 filter cartridge, whilst the internal stainless steel diffuser is fitted with an additional stage of easily replacable disposable filter media.

Corsair supply the full range of replacement filter packs from stock to keep the unit operational.

The *Vortex Pod* is a slimline unit which does not project into the kitchen, therefore taking up minimal space.

*Welcome to the refreshing world of Corsair*

Each *Vortex Pod* is designed to handle up to 1.2m<sup>3</sup>/s and measures approx 820 x 500mm
